

## Azure openAI service

Azure GPT, your customer data is not stored by Microsoft or OpenAI. Instead, your data is only used to generate the output that you request. Once the output is generated, it is deleted from the Azure OpenAI Service. Customer data is never stored in a way that could be used to identify you or your customers. It is also important to note that the Azure OpenAI Service uses a number of security measures to protect your data, including:

1. Encryption: Your data is encrypted at rest and in transit.
2. Access control: Only authorized users can access your data.
3. Auditing: All access to your data is logged and audited.

If you are concerned about the privacy of your customer data, you can use the Azure OpenAI Service with the following features:

1. Content moderation: You can configure the Azure OpenAI Service to filter out harmful content from your data.
2. Data deletion: You can delete your data from the Azure OpenAI Service at any time.

Overall, Azure GPT is a secure and reliable way to use OpenAI's LLMs. Your customer data is never stored by Microsoft or OpenAI, and it is protected by a number of security measures.

**Data encryption:**

Azure employs encryption to protect data at rest and in transit. This includes encrypting data stored in Azure services and using secure communication protocols for transfer.
